Installing Wife 2.0
Dear Tech Support:

Last summer I upgraded from Girlfriend 7.0 to Wife 2.0. I soon noticed
that the new program began unexpected cash flow processing that took
up a lot of space and valuable resources. In addition, Wife 2.0 installed
itself into all other programs I run and now monitors all other system
activity. Applications such as Poker Night 5.5, Football 7.0, Hunting and
Fishing 9.5, and Racing 3.6 no longer run . . . in fact, my system crashes
whenever I try to run these.

I can't seem to keep Wife 2.0 running in the background while attempting
to run my favorite applications. I've considered going back to Girlfriend
7.0, but the uninstall utility for Wife 2.0 is very expensive! Please help!

Thanks,
A Troubled User . . . (KEEP READING . . . . .)

Dear Troubled User:

This is a very common problem that men complain about.

Many men upgrade from Girlfriend 7.0 to Wife 2.0, thinking that it is just a

Utilities and Entertainment program. But Wife 2.0 is actually a lot like it's
predecessor Wife 1.0 . . . . it is an entirely different OPERATING SYSTEM
and it is designed by its Creator to run EVERYTHING!!! It is also VERY
difficult to delete Wife 2.0 and to return to Girlfriend 7.0. In fact, it is
almost impossible to uninstall this program, or to purge the program files
from the system once it is installed.

We strongly suggest you not go back to Girlfriend 7.0 because Wife 2.0 is
designed to not allow this. Look in your Wife 2.0 manual under Warnings--
-Failure to make good use of this program after uninstalling a faulty Wife
1.0 may indicate a user-operator error or deficiency. I suggest instead
that you install the companion program to Wife 2.0, "Yes Dear" to
augment your use of the Wife 2.0 software.

You also might try entering the C:\APOLOGIZE command in DOS because

ultimately you will have to invoke the APOLOGIZE command anyway
before the
system will return to normal. Failure to use these commands can cause
the system to launch the program Nag Nag 9.5. Once this happens, the
only way to improve the performance of Wife 2.0 is to purchase additional
software such as Flowers 2.1 and Diamonds 5.0!

Best of luck,
Tech Support
